Instructions:
Place the label of each dataset to the archive(s) it could be deposited

Where do I deposit my dataset?

5 min

1: FIB SEM of mouse brain tissue *(Focussed ion-beam scanning electron microscopy)*

2: Drug screening with high-content fluorescence microscopy

3: MRI visualization of neuroinflammation in mice *(Magnetic resonance imaging)*

4: Correlative Light and Electron Microscopy of marine microorganisms

5: MRI of breast cancer patients

6: Segmentation masks for human cells expressing sphingolipid marker
